PRESIDENT'S REPORT 8 September 2016

We progress into exciting and history making times at the Satellite City BMX Club; with the ground works completed, the roof is finally taking form. There are three main sections to the roof. It is intended that Part A will be lifted soon (date to be advised). When the date is announced, should you wish to view, please remain well clear of cranes and do not park in their way; hindering their operating ability will hinder the build progress.

The *Rydgas Race Registrar Hut* has now been delivered. During

one of the lifts, it will be put in its place and in due course plumbed and connected to power. The *Rydgas Race Registrar Hut* will provide a 'one stop shop' for race registration (including transponder checks) and merchandise sales. Prominently located, it will fit in well with the existing structures such as the ablutions and canteen thus not taking away from other space at the Club.

With the new facility will come an 8m and 5m start hill. Whilst we have

one new gate waiting to be installed, on 25 August we received advice that the next is on its way. The new gate is currently making its journey overseas from The Netherlands. At this time, the gate is on track to make it to the track ready for installation prior to the opening event; great news for those that can race from the 8m start hill ☺

The opening of our new facility will be soon; further information about this will be promulgated in due course; stay tuned – follow us on Facebook at <https://www.facebook.com/SatelliteCityBMXClub> or online at <http://www.satellitecitybmclub.com/> for further information.
